SUNNY WOOD INTRODUCES NEW KITCHEN WASTE BASKET CABINETS

Cerritos, CA – June 14, 2021: The product development team at Sunny Wood has been busy innovating exciting pieces that complement and enhance its successful kitchen cabinet collections!

For mid-2021, Sunny Wood is enhancing its kitchen line up with the addition of Kitchen Waste Basket Cabinets available in the Shaker Hill (SH), Grayson (GS), Riley (RL), and Sanibel (SL) collections.

Waste Basket - The single-door, no drawer cabinet has an interior dimension of 19 x 13 x 26 inches and are designed to accommodate either two standard 35-quart waste baskets or one larger standard 50-quart waste basket. If a customer's locality promotes recycling, the double waste basket set up will be ideal for sorting recyclables and non-recyclables. These new cabinets will allow designers to fashion more functional kitchens for customers!

Shaker Hill (SH), Grayson (GS), and Riley (RL) – The waste basket cabinets for these collections will feature their standard dovetail drawer sides and soft-close, undermount drawer glides.

Sanibel (SL) – the waste basket cabinets for this collection will have its standard epoxy glides with an undermount, soft-close drawer glide upgrade available.
